

General Information - DESIGN-BUILD BEST VALUE PARTICIPANTS

Design-Build Best-Value Participants

Consultants who expect to be participating in a Design-Build project must amend their business partner relationship in ECMS to include both Consultant and Construction Contractor relationships. Consultants will be listed in the ECMS Contractor Database as a Service. This includes subconsultants and DBEs.

In order to amend your business partner relationship, fax a statement on your company letterhead, signed by your company signatory, requesting that your company be amended to include the business partner relationship of "Construction Contractor" (Service). Fax the signed statement to the fax number listed below:

Fax number: 717-214-8943

Once your business partner relationship has been amended, USERID security must be amended by your ECMS Administrator to include Construction Contractor security groups such as "Contractor Principal".

If you have any questions or need assistance, please contact the Business Partner Office 717-772-0566.

General Information - Prequalification

Consultants must contact PennDOT's prequalification office to become listed as a service in the subcontractor database.
